

Risk Assessment

Introduction

Under health and safety legislation the main requirement for employers is to conduct suitable and sufficient risk assessments. Indeed, risk assessments form the lynchpin of health and safety management. This course puts the emphasis on practical exercises, meaning that delegates will leave with the ability to perform risk assessments in their own organisations.

Course Content

The course is designed to introduce delegates to the importance of risk assessment in a health and safety management system and includes hazards and risks, health and safety hazard classification, control measures, legislation, hazard identification, risk evaluation/calculation and record keeping.

Learning Outcomes

- Understanding of the practical application of risk assessment techniques
- Understanding of the specific requirements of lone, pregnant and young workers
- Hazard identification techniques
- The ability to categorise and evaluate risk
- Understanding of the requirements for monitoring and reviewing risk assessments

Attended by

All those responsible for risk assessment within the workplace.
